Heavy Precipitation Outlook

Flash Flood Prediction Program

WARM AND DRY WITH BREEZY CONDITIONS TODAY

- Another beautiful day for Denver as dominate westerly upper level winds will result in dry, breezy conditions throughout the day. No chance for any precipitation today as dry air continues to be fed in from the west/northwest over the region with relative humidity at the surface between 10-15% across the District.
- Temperatures today across the plains will be in the low to mid 80's with foothill temperatures in the mid to upper 70's.
- Sunny and clear skies through the day and into the evening will bring mild conditions overnight into Wednesday with overnight low temperatures in the low to mid 50's across the plains with upper 40's along the foothills.

STORM RAINFALL POTENTIAL AND DURATION: No precipitation is expected today or this evening.

A LOOK AHEAD: Cooler Wednesday as a weak disturbance moves through bringing high temperatures into the upper 70's to 80 with dry conditions expected throughout the day. Thursday will warm back up into the low to mid 80's with dry conditions expected once again. A cold front will move in Friday resulting in cooler temperatures across the District in the low to mid 70's with a chance for afternoon showers/isolated thunderstorms with a slight chance of lingering showers until midnight.

MONITOR NATIONAL WEATHER SERVICE FOR SEVERE WEATHER STATEMENTS.
